

Data Encryption Audit - Evidence Note

DEMO ATTACHMENT - FAKE DATA ONLY

Field	Value
Demo site	Site 71 - Valencia Data Operations Center
Certification ID	32
Inspection date	2026-03-11
Prepared by	Demo Certification Bureau
Document status	Training sample

Scope

Review of encryption controls for stored customer records, operational logs, and backup media.

The review is based on fictional sample systems and is intended to support the compliance MVP demo workflow.

Observed evidence

Primary application database encryption was documented as enabled. Backup encryption evidence was incomplete for one legacy export process.

Key-rotation notes were present but did not clearly identify the owner responsible for quarterly review.

Review note

The finding should be treated as a documentation gap rather than proof of an active technical failure.

This document is intentionally fictional and should be used only for local demo/tutorial data.
